

WHAT ARE **ADVANCED** **WORKPLACE SENSORS?**

1

WIRELESS SENSOR MESH

Replaces existing lighting control solutions with 5 core competencies: Climate, Security, Utilisation, Safety, Lighting

2

AUTONOMOUS ENERGY OPTIMISATION

A constellation of sensors and granular data collection leads to machine learning and autonomous optimisation.

3

USES LIGHTING INFRASTRUCTURE

Allows for higher sensor density and broader control functionality to create digital ceiling constellations.

4

CLOUD PLATFORM ANALYTICS

Platform agnostic (can be hosted on clients own environment) for reporting and visualisation across portfolio of assets globally

A NEW CATEGORY OF BUILDING INTELLIGENCE
